

MATHEMATICS CURRICULUM (Effective 2012-1)

* If a 'B' or better is earned in MAC 1105, students may take the MAC 1147 Precalculus/Trig combo course as the prerequisite for MAC 2311 instead of both MAC 1114 and MAC 1140. If a 'C' or a 'D' is earned in MAC 1105, both MAC 1114 and MAC 1140 are required prerequisites for MAC 2311. Note: MAC 1114 and MAC 1140 may be taken concurrently.

** For MGF 1106 and 1107: $EA \geq 90$, but for MAC 1105: $EA \geq 100$ AND $CM \geq 43$.

- Students should be strongly encouraged to begin their math courses early in their college experience.
- Students should be strongly encouraged to take their math courses in consecutive terms. Students with a gap between the time they take a math course and its prerequisite have a decreased probability of success.
- It is strongly recommended that students who intend to take MAC 1105 and either of the courses MGF 1106 or MGF 1107, take MAC 1105 first.
- Although MGF 1106 is now a prerequisite for STA 2023, it is NOT a prerequisite for MAC 2233, MAC 1114, MAC 1140, or MAC 1147.
