# International Organization for Standardization Certification Training

## ISO 14001:2015 Certification: Environmental Management System Development Two Days

**Day 1:** ISO 14001:2015 Certification and Quality Management System (QMS) Overview

**Day 2:** Internal Audits, Key Performance Indicators (KPIs) and Management Reviews

**Session Description:** This training focuses on the structure, development, and corresponding documentation necessary to meet the requirements for ISO 14001:2015 Certification. The course reviews the certification requirements and their application to a company or organization for the creation of a pillar of environmental sustainability. Each participant who completes the course receives training in the following:

- A. The precise requirements for ISO 14001:2015 Certification
- B. The environmental aspects and impacts to consider
- C. Application of the ISO 14001:2015 Certification requirements to an organization
- D. Structure and development of the necessary documentation
- E. Methods to communicate with employees and engage the entire organization in the certification process
- F. Determination of the appropriate environmental objectives for a management system
- G. Incorporation of environmental sustainability within an organization
- H. Performance of internal audits
- I. Processes for document management reviews
- J. Preparation for a certification audit
- K. Continuous improvement processes for a quality management system
