

# Empowerments for Student Learning Exclusively for Adjuncts

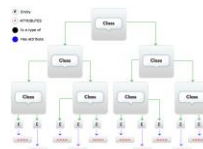

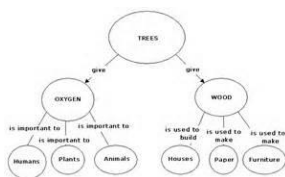

Honoring active learning and supportive teaching environments in a changing paradigm of higher education

*Expand your knowledge. Broaden your resources. Spark students' inspiration.*

## Volume 3, Issue 7

As the semester nears the end, our students need multiple study tips and tools for successful completion. Remind them to use concept maps as they take notes or review for exams. Concept maps may be simple or complex, depending on personal learning style. They are simply diagrams that relate the elements of a concept to other elements or to the main idea. The maps help organize thoughts, encourage critical thinking, and increase the possibility of recall. Model a few in your class. Have students create their own maps and then share or compare with a partner.

Concept map samples found at:
